

## 2007 Mustang Color black

2 red racing stripes all the way from bottom of grille to the start of the hood scoop then from the back of the hood scoop to the beginning of the windshield (don't want the EGA on top of 2 red racing stripes) and then the rest would be like a normal 2 red racing stripe appearance from the top of the windshield to the bottom of the bumper.

Realistic-flame job on sides coming out of the front wheel well ending at the front of the back wheel well

Large functional hood scoop (black like the rest of the car minus the 2 red racing stripes)

Gold colored EGA (Marine Corps Eagle, Globe, and Anchor) painted on the top of the hood scoop

Gold colored functional spoiler as shown below with red u-s-m-c (one letter on each shark fin going from left to right)
